## Safety and comfort for any adventure on the water.

The Mariner – Our premier drysuit. Made with waterproof three-layer eVent® fabric, the most breathable material available. This is the drysuit for the kayaker who wants, and needs, the best. The removable hood, with its fleece-lined chin area, has three barrel-lock adjustments for a custom, non-binding fit. Rugged Cordura® on the seat and knees reinforces these high-wear areas.

High quality YKK® entry zipper, latex neck and wrist gaskets and latex socks ensure your layers stay dry. Low-profile, removable internal suspenders and a webbing belt improve the fit. There's also an extra wide relief zipper for convenience and the splash-proof zippered shoulder and thigh pockets keep essentials accessible. And, the extensive reflective tape and piping makes you highly visible in low light conditions. Sorry this text is so long, but how else can we cover all these great features?

## This Sasquatch isn't hairy or mythical.

Okay, it's not pretty either, but it's darned comfortable and functional. Plenty of room for your toes, low profile, flexible. The HydroCuff™ snugs above the ankle to keep out splash and trash. The textured rubber in the sole contains recycled rubber and gives good traction and protection from rough terrain. A hook-and-loop instep strap securely locks the shoe to your foot. Rugged rubber wraps up from the sole to protect the sides, top and heel of your foot. If you want a great boating shoe, make tracks in your NRS Sasquatch.

## Take on the World — Wet or Dry.

Designed and engineered at the request of the U.S. Navy Seals, the OTB Abyss takes on wet and dry terrain in the toughest conditions. Razor sipping of the grippy, lugged sole brings traction to the highest level. Ballistic mesh panels in the upper and drain ports in the sole allow swift water drainage and breathability for foot comfort. High abrasion TPU reinforcing material in the upper wears like iron and gives good ankle support. The unique three-part insole gives you maximum adjustment for fit and stiffness. If you're looking for a shoe that works as hard as you do, you've found it.

## The river guide, rescue agency and adventure racer's favorite.

These are the hardest working boots on the water. Heavy-duty lugged traction sole keeps you on your feet in varied terrain, and the comfortable 7-mm neoprene insole absorbs the shock of every step. Lace-up synthetic leather and 5-mm neoprene upper provide warmth, unmatched ankle support and a secure fit.

## Comfort and warmth without the bulk.

The comfortable, flexible fit and excellent palm-to-finger grip work together for greater control of your paddle or oar. A DWR outer coating repels water while the soft ThermalPlush lining helps retain body heat. These features, along with a 0.5-mm neoprene layer, add up to one solid cool-weather glove.

# HydroCuff™

The lips of the cuff curve inward to form a snug seal that helps keep out water and debris. There's no wrist strap to fumble with or restrict your movements, just a secure, stretchy closure that keeps in your warmth, while holding the elements at bay.

Innovation... NRS-style.

## Finally, a waterproof alternative for boaters.

This 2-mm neoprene glove, with titanium adhesive, has fully taped seams that make it completely waterproof up to the wrist. We've added the unique HydroCuff™ above the wrist. It fits snugly around your forearm to help seal out leakage. The rubberized "spider web" pattern on the palm gives you a positive grip and the slightly pre-curved fingers ease wearing comfort. This Rogue cheats the elements.

### Rogue Gloves

## Waterproof and exceptionally warm without sacrificing paddle feel.

Is this for real? LiquidSeam™ glued seams are fully waterproof. The textured RawHide™ palm has the grippiest possible surface and the raw neoprene top sheds water like a duck's back to eliminate evaporative cooling. 2-mm neoprene, with titanium, throughout gives excellent warmth. And we didn't stop there. The HydroCuff™ opening seals tight above the wrist to help keep out water and debris. Add slightly pre-curved fingers for gripping comfort and you've got a glove no one else has put a brand on.

### Maverick Gloves

### Our warmest glove features a soft, microfleece lining.

Reactors are the warmest 3.5-mm gloves we make. RawHide palm and pre-curved fingers ensure superior grip and superb control. GripCote on the backs of the fingers reduces evaporative cooling while the soft MicroPlush lining adds comfort. Seams are glued and blind-stitched to keep water out.

### Nothing keeps hands warm like mittens.

If you can't ever seem to find a pair of gloves that really keep your hands warm, try Toaster Mitts. The 3.5-mm neoprene back provides superior warmth, while the 2.5-mm RawHide palm gives you improved control and feel. Finger area is pre-curved for increased grip but flexible enough not to limit your hand's mobility.

## ABCs of PFDs

NRS offers a wide selection of Coast Guard-approved Personal Flotation Devices (PFDs) from leading manufacturers. Before you venture onto the water, find the right PFD here or on the web at [nrsweb.com](http://nrsweb.com).

### PFD Style:

**LOW PROFILE:** Popular among those with shorter torsos, women and kayakers. Flotation is centered lower on the torso. Flotation panels tend to be smaller in size yet thick. *Design flotation: 15.5 – 18.5 lbs.*

**MEDIUM PROFILE:** Used by a wide range of boaters. Flotation is distributed throughout the torso area. Flotation panels tend to be larger but thinner than in the Low Profile models. *Design flotation: 15.5 – 18.5 lbs.*

**HIGH PROFILE:** Preferred by outfitters, big water boaters and non-swimmers. Flotation is distributed throughout the torso area. Flotation panels tend to be large and thick. *Design flotation 22.0 – 27.0 lbs.*

**RESCUE:** For those with swiftwater rescue training. Flotation is Low to High Profile. Equipped with a quick release rescue belt and reinforced shoulder straps. *Design flotation: 16.5 – 27.0 lbs.*

**CHILD/YOUTH PFDs:** Child specific configurations of flotation to fit young people's growing bodies. *Design flotation: All vests meet U.S. Coast Guard requirements.*

## NRS Pilot Knife

This is the rescue knife you've been hoping for. The cutting edge has both smooth and serrated sections, plus a rope cutter hook. Blade tip is flattened for safety and doubles as a screwdriver. The unique sheath firmly locks the knife in place and only lets it go when you squeeze both sides of the release. Contoured handle and rubberized grip gives you maximum control of the blade.

Length: 7.38", 3" blade Weight: 5.5 oz.

Color: orange, black

#2755 / \$39.95

## NRS Wingman Knife

The Wingman's solid construction ensures dependable utility when you need it most. One-hand flip open for quick deployment. The blunt-tipped blade has smooth and serrated sections and locks open for safety. Removable spring steel clip secures it to your belt or lash tab. And you gotta love the bottle opener.

Length: 6.75", 2.75" blade Weight: 3 oz.

#2771 / \$29.95

## NRS Co-Pilot Knife

The Pilot Knife has a little brother - the NRS Co-Pilot. Great features - smooth and serrated cutting edges, blunt safety tip, contoured handle with a rubberized grip and an integrated bottle opener. Compact design is a fine fit on your PFD.

Length: 5.75", 2.25" blade Weight: 4.6 oz.

## Favorites among professional guides.

These knives are easy to pull from their sheaths and are comfortable and secure to hold in wet and cold environments. The molded friction release sheaths clip securely to a belt or PFD lash tab. The River Shorty has a fully serrated edge and blunt safety tip. The River Runner has a half-smooth, half-serrated blade, with a pointed tip.

## Touring Safety Kits

All the essential safety items for touring and sea kayaking. Both kits include a bilge pump, paddle float, boat sponge and a whistle. The Deluxe kit also comes with a paddle leash, the HotShot Signal Mirror/Whistle combo and is packaged in our compact mesh deck bag.

### Paddle Float

The ideal aid in an in-the-water kayak re-entry.

Slip the self-draining main pocket over your paddle blade, fasten the webbing leash to the shaft and inflate one of the dual air chambers. This creates a functional outrigger, adding stability to self-rescue situations.

## NRS Flip Lines

Flip lines provide the extra leverage you need to right an overturned boat. 14' of 3/8" polypropylene safety line is stored in a rugged Cordura® bag and secured by a draw-

string closure. Loops on bag attach around frame or D-ring. Sold in pairs.

#1815 / **\$34.95**

## NRS Bowline Bag

Rescue bags are for rescue. With a Bowline Bag at each end of your boat, you'll always have a handy line to tie your boat to shore. The sturdy Cordura® bag has a mesh bottom for drainage and a drawstring closure to keep your rope secure and easily accessible. Rope is 3/8" polypropylene.

## Cataract Oar Shafts

Since 1986, Cataract oar shafts have been the top choice for boaters looking for a stronger, lighter and more responsive oar. Made by Advanced Composites, these maintenance-free fiberglass/carbon shafts weigh less than aluminum, and they're twice as strong. The SGG model flexes through the first part of your stroke, much like a wooden oar. Then the shaft rebounds similar to a fishing pole for strong, whip-like action that translates more of your muscle energy into the water. The 9' and 10' lengths are available with a factory rope wrap. The rope protects the shaft and helps eliminate some of the noise of rowing, which you'll appreciate even if you're not fishing.

## Sawyer Cobra Oarlocks

The unique shape of the Cobra Oarlock gives increased strength and range of motion. The wide horns distribute the load of the oar across a larger surface, and the oval opening allows up to 15 degrees more vertical range. Bronze alloy construction withstands years of heavy use. Deluxe model is threaded to fit the included lock-nut.

**Deluxe  
Cobra Oarlock**  
#1401.5 / \$79.90/pr.

## a. Oar Rights

Oar Rights tighten securely over the Molded Oar Sleeve and keep the oar blade square to the water. If you prefer not to "feather" your blades during the recovery, the Oar Rights allow you to simply drop the blade in and begin your stroke without worrying about the blades twisting forward or back. The 2-1/4" inner diameter requires a Molded Oar Sleeve to fit Cataract and Carlisle shafts.

#1404 / \$35.95/pr.

## b. Molded Oar Sleeve

Protect your oar shafts from scratches and gouges caused by metal oarlocks. Fits Carlisle and Cataract shafts. If you're going to use Oar Rights, you'll need these sleeves to get the correct fit.

## NRS Dura Soft Coolers

The cooling capacity of these flexible coolers, with temperature-reflective Mylar® and closed-cell foam insulation, rivals that of hard-sided coolers. Rugged cloth exterior can take a beating and the liner is removable for easy cleaning. All have D-rings for easy tie down. The Large cooler has an accessory pocket and sturdy carry handles. The Small and Six Pack sizes come with a wide shoulder strap. The 30-Can Cooler adds a heavy-duty welded urethane bottom and an external mesh pocket.
