# NRS HydroSilk™

## Perfect for layering and sun protection.

Our 8-oz. nylon/spandex blend is cool and soft against your skin. UPF 50+ protects you from the sun's harmful rays making this an ideal solo layer in the summer. HydroSilk works great as a base layer in cooler temperatures, wicking moisture away from your skin and drying quickly. Imported.

*“Great shirt, looks awesome on. Wear alone on cool days or as a base layer on really cold days. Either way you'll look like a pro in it!”*

# NRS WaveLite™

## Warm up your life with WaveLite.

Now in Polartec® Power Stretch® material! The body-hugging 4-way stretch moves when you do for instant-action mobility.

"Touch points" on the soft inner layer swiftly wick moisture away from your skin to the outside of the fabric, where it spreads rapidly and evaporates. The smooth outer surface is wind- and abrasion-resistant for comfort and durability. Feels great, performs like no other... WaveLite protects. Imported.

### The most comfortable shoe we've ever built.

The Desperado Shoe is ultra low-profile, very comfortable and offers great support for extended portages and side hikes. A 3-mm neoprene upper with a stretchy spandex exterior is combined with additional 3-mm neoprene padding in the toes and heel for in-the-boat protection. The foot bed is built with a plastic shim and a 3-mm vulcanized rubber sole for traction and protection. Imported.

### This Sasquatch isn't hairy or mythical.

But it's as rugged as that big fellow and darned comfortable and functional to boot. Plenty of room for your toes, low profile, flexible. The HydroCuff™ snugs above the ankle to keep out splash and trash. The textured rubber in the sole contains recycled rubber and gives good traction and protection from rough terrain. A hook-and-loop instep strap securely locks the shoe to your foot. Rugged rubber wraps up from the sole to protect the sides, top and heel of your foot. If you want a great boating shoe, make tracks in your NRS Sasquatch. Imported.

## Factory tested...100% waterproof!

The Boundary Shoe pushes the limits of what a neoprene boot can do: it's a touring, canoeing and portaging dream. When wading is inevitable, you'll appreciate the knee-high, 5-mm neoprene upper that's glued, blind-stitched and double-taped to be totally waterproof. Comfy 7-mm insole atop a vulcanized rubber sole provides the protection and support you've come to expect from our footwear.

Based on our popular Paddle Shoe, this mukluk-style boot features a high-traction sole and instep strap for secure footing. Imported.

## Take on the World — Wet or Dry.

Designed and engineered at the request of the U.S. Navy Seals, the OTB Abyss takes on wet and dry terrain in the toughest conditions. Razor sipping of the grippy, lugged sole brings traction to the highest level. Ballistic mesh panels in the upper and drain ports in the sole allow swift water drainage and breathability for foot comfort. High abrasion TPU reinforcing material in the upper wears like iron and gives good ankle support. The unique three-part insole gives you maximum adjustment for fit and stiffness. If you're looking for a shoe that works as hard as you do, you've found it. Imported.

# HydroCuff™

The edges of the cuff curve inward to form a snug seal that helps keep out water and debris. There's no wrist strap to fumble with or restrict your movements, just a secure, stretchy closure that keeps in your warmth, while holding the elements at bay.

Innovation... NRS-style.

## Finally, a waterproof alternative for boaters.

This 2-mm neoprene glove, with titanium adhesive, has fully taped seams that make it completely waterproof up to the wrist. We've added the unique HydroCuff™ above the wrist. It fits snugly around your forearm to help seal out leakage. The rubberized "spider web" pattern on the palm gives you a positive grip and the slightly pre-curved fingers ease wearing comfort. This Rogue cheats the elements. Imported.

## Waterproof and exceptionally warm without sacrificing paddle feel.

Is this for real? LiquidSeam™ glued seams are fully waterproof. The textured RawHide™ palm has the grippiest possible surface and the raw neoprene top sheds water like a duck's back to eliminate evaporative cooling. 2-mm neoprene, with titanium, throughout gives excellent warmth. And we didn't stop there. The HydroCuff™ opening seals tight above the wrist to help keep out water and debris. Add slightly pre-curved fingers for gripping comfort and you've got a glove no one else has put a brand on. Imported.

### Warmest glove. Super flexible fit.

Most warm gloves make your hands feel like they're in plaster casts. The Natural uses stretchy PowerSpan™ and Extend™ face fabrics for outstanding flexibility and wearing comfort. The HydroCuff™ wrist closure combines with glued and blindstitched seams for water resistant warmth. Grippy palm material extends across the thumb web for paddle wear protection and the fleece thumb panel makes a great nose wipe! Imported.

## ABCs of PFDs

NRS offers a wide selection of Coast Guard-approved Personal Flotation Devices (PFDs) from leading manufacturers. Before you venture onto the water, find the right PFD here or on the web at [nrsweb.com](http://nrsweb.com).

### PFD Style:

**LOW PROFILE:** Popular among kayakers, women and those with shorter torsos. Flotation is centered lower on the torso. Flotation panels tend to be smaller in size yet thick. *Design flotation: 15.5 – 18.5 lbs.*

**MEDIUM PROFILE:** Used by a wide range of boaters. Flotation is distributed throughout the torso area. Flotation panels tend to be larger but thinner than in the Low Profile models. *Design flotation: 15.5 – 18.5 lbs.*

**HIGH PROFILE:** Preferred by outfitters, big water boaters and non-swimmers. Flotation is distributed throughout the torso area. Flotation panels tend to be large and thick. *Design flotation 22.0 – 27.0 lbs.*

**RESCUE:** For those with swiftwater rescue training. Flotation is Low to High Profile. Equipped with a quick release rescue belt and reinforced shoulder straps. *Design flotation: 16.5 – 27.0 lbs.*

**CHILD/YOUTH PFDs:** Child specific configurations of flotation to fit young people's growing bodies. *Design flotation: All vests meet U.S. Coast Guard requirements.*

### C-Tug Boat Cart

This cart is stout, sturdy, and ridiculously simple. The C-Tug supports 300 lbs. of weight and collapses to stow in a mid-sized kayak hatch. Seven simple components break apart and snap together with ease. Parts won't corrode, rust, or gum up from sand.

#50091.01 / **\$159.95**

### Mighty Mite Boat Cart

Make hauling your kayak or canoe to the water a breeze. Large 10" diameter wheels simplify transport over uneven terrain.

Fits in most kayak hatches. Supports up to a 150 lb. load

#50093.01 / **\$79.95**

## Navisafe Navi Lights

These powerful lights have 16 bright LEDs that make you visible over long distances. They attach to almost anything with their double magnetic system; so powerful it will clamp right through a plastic hull. Compact enough to fit in a pocket, waterproof and they float! The Navi Light Red/Green gives you multiple modes for the standard port/starboard/stern navigation signals. The Navi Light 360° has steady and flashing modes and it also serves as a camp lantern. These lights operate for many hours on 3 AAA batteries (not included).

## NRS Infinity Flotation

These will be the last float bags you buy, because they won't leak, ever. The urethane material simply can't delaminate. Put them in your boat, blow some air inside, and forget about them.

**Guaranteed for life.**

### 3-D Canoe Solo Flotation

Designed to fit the bow and stern areas of the most popular whitewater solo canoes. Anchor loops along the surface provide tie-down points for rigging.

*Dimensions (inflated):*

Long: 57" long, 38" wide, 24" deep

Short: 42" long, 40" wide, 24" deep

**#50085.01 Long / \$102.95**

**#50086.01 Short / \$86.95**

### 3-D Canoe End Flotation

Our 3-D End floats are patterned to fill the space behind the stern seat and in front of the bow paddler's legs in most tandem canoes.

*Dimensions (inflated):*

29.5" long, 28.5" wide, 18" deep

**#50087.01 Pair / \$71.95**

Single Bag / \$42.95

### Canoe Center Flotation

The Center Float fits in the area between the two seats of a tandem canoe, leaving just enough room for the stern paddler's legs. Patterned to fit most tandem designs.

*Dimensions (inflated):*

49.5" long, 32.5" wide, 24" deep

**#50088.01 / \$122.95**

## Split Kayak Flotation

Long and narrow flotation bags fit on either side of a kayak's center support pillar. The full set includes two bow bags and two stern bags. Bow bags fit forward of the foot area of most kayaks longer than 8'.

*Dimensions (inflated):*

Bow: 23" long, 10" wide at top, 3" wide at point

Stern: 33.5" long, 13" wide at top, 3" wide at point

## NRS Drylander Shock Cord and Rawhide Skirts

Years of evolution in sprayskirt design has led to the creation of our NRS Drylander series. Both models are patterned to stretch easily and fit drum-tight on today's kayak cockpit designs. Rubberized inner deck coating grips the cockpit rim from the inside, resisting slippage and implosion. The 4-way stretch PowerSpan neoprene tunnel material gives a snug fit without constricting. Rawhide model features a tough, raw neoprene deck surface that holds up to any abuse you can imagine.

# NRS Revolution Series Rafts

Tough, light, rigid... fun! The Revolution is here. Highly abrasion and puncture resistant polyurethane-coated nylon material keeps the weight down while providing a stiff, wave busting ride. Patterned similarly to the NRS Otter and Expedition rafts, these time-tested shapes excel whether you're paddling or rowing whitewater, fishing for the Big One, or enjoying multiday adventures with friends and family. Come and join the Revolution... you'll be glad you did.

# NRS Osprey Series Rafts

Designed to get your blood pumping, the Ospreys are maneuverable, agile and quick. Their high rocker makes for a fun ride in white-water and the shorter waterline lets you spin quickly to catch that eddy above your favorite fishing hole. The polyurethane-coated nylon material is light in weight, great at holding air and major abrasion and puncture resistant. Day tripping, spending days on the water, fishing, looking for surf waves, screaming your head off at the bottom of a rapid... it's all there in an Osprey.

## NRS Heavy Duty Straps

Introduced over 25 years ago, our straps have been used for virtually every hold-down application imaginable. Keep some in your garage, your storage shed, the trunk of your car and the bed of your truck. The 1" high-tenacity polypropylene webbing is manufactured to a tensile strength of 1,500 lbs. The cam buckles are able to hold over a 2,000 lb. tensile load.

## Superston Oarlocks

The properties of our exclusive manganese/bronze alloy give these oarlocks amazing strength. They also have great "metal memory" so that if an oar gets forced up through the horns, they spring back to their original shape. The 3-1/2" long shafts are precision-turned to a 5/8" diameter and a hole is drilled in the end to accept the included split ring or a Lynch Pin Keeper. Horn opening in 1-5/8" wide with a 2-3/8" inner diameter. Sold in pairs and singles; be sure to bring a spare. Proven in big whitewater the world over.

**Superston Oarlock**

#77407.01 / \$75.00/pr.

## Cataract Oar Shafts

Since 1986, Cataract oar shafts have been the top choice for boaters looking for a stronger, lighter and more responsive oar. Made by Advanced Composites, these maintenance-free fiberglass/carbon shafts weigh less than aluminum, and they're twice as strong. The SGG model flexes through the first part of your stroke, much like a wooden oar. Then the shaft rebounds similar to a fishing pole for strong, whip-like action that translates more of your muscle energy into the water. The 9' and 10' lengths are available with a factory rope wrap. The rope protects the shaft and helps eliminate some of the noise of rowing, which you'll appreciate even if you're not fishing.

## a. Oar Rights

Oar Rights tighten securely over the Molded Oar Sleeve and keep the oar blade square to the water. If you prefer not to "feather" your blades during the recovery, the Oar Rights allow you to simply drop the blade in and begin your stroke without worrying about the blades twisting forward or back. The 2-1/4" inner diameter requires a Molded Oar Sleeve to fit Cataract and Carlisle shafts.

#77412.01 / \$35.95/pr.

## b. Molded Oar Sleeve

Protect your oar shafts from scratches and gouges caused by metal oarlocks. Fits Carlisle and Cataract shafts. If you're going to use Oar Rights, you'll need these sleeves to get the correct fit.
