**NRS**

"We don't live in the past,  
but we're damn proud of it."

In 1972, the first NRS catalog rolled out of Bill Parks' typewriter with a single, simple purpose: to put quality gear in the hands of boaters, headache and hassle free. 40 years later, our catalogs have become part of boating culture, gracing coffee tables and toilets around the world. We've also moved beyond paper to become the best paddlesports source on the Web. At [nrsweb.com](http://nrsweb.com), you'll find our full selection of gear plus tons of helpful videos and articles. At [community.nrsweb.com](http://community.nrsweb.com), you'll find more boating culture than your coffee table can hold. But whether you favor paper or pixels, you'll always find a company committed to Bill's original vision. Great gear. Best service. Good times.

# NRS WaveLite™

Warm up your life with WaveLite.

Now made with Polartec® Power Stretch®! This body-hugging four-way-stretch material moves when you do for instant-action mobility. "Touch points" on the soft inner layer swiftly wick moisture away from your skin to the outside of the fabric where it spreads rapidly and evaporates. The smooth outer surface is wind- and abrasion-resistant for comfort and durability. Feels great, performs like no other... WaveLite protects. Imported.

**NEW PRODUCTS**

**Protection from the cold**

**NRS HydroSkin™**  
Skin is in! NRS proudly introduces our NEW HydroSkin products. You'll appreciate how tough this gear is when you realize you've given them years of adventuring and they're still giving you the performance and comfort you love. Like a second skin they protect you from cold water and chilly winds. Insulating 4-way stretch micro-plush fabric lines the tough, water-repelling HydroSkin providing extra warmth and softness. The ultra-thin 0.5 mm DuPont neoprene with TiCoat™ insulation and per Stretch Lycra offer highly efficient insulation while retaining flexibility and comfort. Ultra snag and tear resistance ensures your gear will last for years.

**HydroSkin™** is a custom-built fabric, designed by NRS using a brand new technology that allows neoprene thickness as thin as a 1/2 a millimeter. This innovative fabric helps us create active-stretch paddling apparel with high levels of insulation. PowerSpun™ is our tough outer layer that allows the HydroSkin™ to stretch and fit comfortably without binding or constricting movements. TiCoat™ prevents body heat from escaping and the MicroPlush™ lining is an added super-soft insulation.

## Your throw rope protects your friends. Make sure they're carrying one for you.

The rescue throw bag is an essential safety tool; don't go on the water without yours. You need it for swimmer rescue and emergency boat extractions. Super tough Cordura® fabric takes the wear. Mesh panels reduce dry time. The rescue rope and the bag float on the surface of the water so they're right where you need them. We flare the nylon top for a smooth flow and rapid reloading. Pro models include extra-strong rope and 1" reflective tape for increased visibility.

## NRS Bill's Bag

*Circa 1979*

For years, river runners used military surplus bags to keep their gear dry. But in the mid-70s, we realized that the supply of those makeshift dry bags was drying up. So, after considerable trial and error, the Bill's Bag was born, first appearing in the 1977 catalog. That year you could have any color you wanted, as long as it was bright orange. (Bill had scored a shipment of unsold truck tarp material.) The first of its kind, the Bill's Bag has been improved over the years, as have color options. Often imitated, but never equaled.

# Our classic dry bag – it's a best seller!

## The driest, toughest, most imitated dry bag – and still the best.

The tough 21-oz. PVC/polyester body and 34-oz. PVC/polyester round bottom will take years of abuse. The innovative StormStrip™ closure ensures the most waterproof seal on the market. Comfortable, ergonomic backpack harness makes it easy to carry up the beach or on a long portage. Bag handle and compression straps are welded to the bag with our heavy-duty double patch system. The 34-oz. floor of the Heavy Duty extends six inches up the sides for added durability.

## OTTER

At last! An affordable small raft that's built for lasting performance. In designing the NRS Otter, we wanted to produce a fun, responsive craft suitable for many different water conditions, and one that an aspiring boatman on even the most limited budget could afford.

The NRS Otter features an innovative design that maximizes desirable handling characteristics while minimizing construction costs. The parabolic bow chamber increases gradually in diameter from 16½" to 24", giving the NRS Otter the lively handling characteristics for which it was named. In addition, the rounded stern chamber is enlarged by 2" to help prevent swamping from the rear by big waves even when a stern paddler's weight is added. The two inflated cross thwarts provide additional seating, rigidity, and buoyancy, and are formed as separate chambers before gluing into the boat to eliminate those hard-to-side to side, because there is greater safety in this method of construction. Finally, all chambers have recessed military-style valves for quick inflation/deflation.

Other features that make a big difference in the NRS Otter's durability and longevity are a reinforced 840 denier nylon fabric floor and a 420 denier nylon fabric tube, protected by a tough rubberized coating that makes the Otter airtight and resistant to abrasion and weathering. The 3/16" polypropylene lifeline is secured by molded-in web reinforcements, and the bowline is secured to a 1 3/4" D-ring. If price and a taste for quality has kept you from owning a raft before, the Otter is made for you. Shipped prepaid—Parcel Post.

**\$235.00**

**OTTER ACCESSORIES** Although the Otter was designed primarily as a paddle boat, if you want to row it, we offer a pair of optional glue-on rubber oarlocks (please see the #152 8-man Udisco on p 7 for a photo of these oarlocks). We recommend using the #199

## RAFTS

Otter on Selway River

## Otter Raft

Circa 1983

Named for that quick and playful river creature, the Otter first appeared on the water in 1982. 13'1" long and 5'6" wide, its 17" tubes increased to 24" in the bow and 19" in the stern. It was an "everyman's raft", priced at only \$165, or \$180 with the motor mount. It wasn't built with the top-quality materials that today's Otters feature, but there are still some original Otters out there on the river!

## NRS Otter Series Rafts

Striking a perfect balance between weight savings and toughness, we build Otter tubes and floors with 41-oz. Pennel Orca® fabric. We also add super tough HD40 wear patches to the tube bottoms. The batten attachment thwart (BAT) system is easy to install, remove and reposition. Otters feature top-quality Leaffield C7 valves, 12 big D-rings for easy rigging, and 4 EasyCarry™ handles. 3 main-tube air chambers for safety. 5-year Limited Warranty.

# NRS Revolution and Osprey Rafts

Tough, light, rigid... fun! The Revolution is here. Highly abrasion- and puncture-resistant polyurethane-coated nylon material keeps the weight down while providing a stiff, wave busting ride. This weight savings makes you more nimble and maneuverable, whether you're dodging holes or putting a fisherman in the right place. These boats excel whether you're paddling or rowing whitewater, fishing for the Big One, or enjoying multiday adventures with friends and family. Come and join the Revolution... you'll be glad you did.

#77301.01 / \$139.95

## Cataract Oar Shafts

Since 1986, Cataract oar shafts have been the top choice for boaters looking for a stronger, lighter and more responsive oar. These maintenance-free fiberglass/carbon shafts weigh less than aluminum, and they're twice as strong. The SGG model flexes through the first part of your stroke, much like a wooden oar. Then the shaft rebounds for strong, whip-like action that translates more of your muscle energy into the water. The 9' and 10' lengths are available with a factory rope wrap. The rope protects the shaft and helps eliminate some of the noise of rowing, which you'll appreciate even if you're not fishing. SGX shafts are 33% stiffer for larger, heavier boats.

Please note: Lengths listed are the lengths of the entire oar (shaft and blade).

## K-Pumps

Built to last and designed for easy use and storage. The K-100, K-200 and K-Pump Mini are perfect for fully inflating small rafts, SUPs, and IKs, or for topping off the chambers of a raft or cataraft. The K-20, K-40 and K-400 do it all! They have a unique two-stage design; use the high-volume mode to put most of the air in, then lock in the high-pressure stage to top off the craft drum tight. And all of these pumps can crank up the pressure – up to 15 psi! No hoses to kink or pop out. Pumps include valve adapters, rugged storage bag, and two “bungee balls” for securing the pump to your boat. These innovative pumps work with most inflatable boat valves and come with an unlimited 2-year warranty. For use with military valves, please call for options.
