H₂CORE™

LAYERING FOR PADDLERS

NRS H2Core is the first and only layering system designed specifically for paddlers. Perfectly placed seams create friction-free zones where other clothing rubs paddlers wrong. Advanced technical fabrics wick moisture, dry quickly and protect you from harmful UV rays. Unlike general-purpose outdoor apparel, H2Core's features enhance, not detract from, your time on the water. So pick your perfect combo and go paddle.

HYDROSKIN®

0.5 | 1.0 | 1.5

When your clothing's adaptable, you're adaptable—to conditions, situations, opportunities. HydroSkin gives you the freedom to adapt, so you can go paddle when others go home. Only HydroSkin gives you a range of options between wearing no immersion protection and wiggling into a wetsuit. Three neoprene thicknesses from 0.5 mm to 1.5 mm and a variety of tops and bottoms let you layer to match the weather and water, while paddler-specific designs ensure friction-free comfort and freedom of motion.

HYDROSKIN 0.5

Stretchy 0.5 mm neoprene material provides lightweight immersion protection to help extend your season. Four-way-stretch exterior allows unrestricted movement, and the ThermalPlush™ lining feels great against your skin.

IDAHO SOUL

We design every piece of NRS gear and apparel in-house in Moscow, Idaho. Who we are and how we live informs every seam, stitch, material and fastener. Behind these shoes are 40-plus years of dusty roads, crusty towns, clear lakes and wild rivers—memories of hiking out after losing a paddle, changing a tire 30 miles from nowhere, dancing with locals beside a tavern jukebox, rolling out sleeping pads under the stars. We stamped our Idaho soul, literally, on their soles, but the memories you make in them are your own.

CRUSH

For days in the boat and nights around town. For the rig-shuttle-shuffle and the treacherous trail from the fire ring to your tent. The Crush combines technical performance with casual comfort like no other shoe on the water.

YAK YAK BOAT CARTS

Over the years, we've seen a lot of different boat carts, tested a lot of boat carts, sold a lot of boat carts. But we've never found a model that met all our criteria for what a good boat cart should be: lightweight, compact, easy to use and maintain, reasonably priced, and effective on a variety of surfaces. So we decided to build our own. We made it lightweight and rust resistant, and it folds compactly for easy stowing. Tried-and-true NRS loop straps secure your boat, not some funky ratchet or belt. The removable wheels are airless—no odd-size tubes to replace—with a wide footprint and smooth-rolling rubber tread. Two sizes fit nearly any canoe or kayak, and you won't need a wheelbarrow full of cash to buy one.
