# CATARACT OAR SHAFTS

Updated with an innovative notched handle to let you know the orientation of the blade without taking your eyes off the downstream line. These maintenance-free fiberglass/carbon shafts weigh less than aluminum, and they're twice as strong. Cataract, Carlisle, and Sawyer blades with 1-5/8" shank fit these shafts.

Please note: Lengths listed are the lengths of the entire oar (shaft and blade).

## SGG

The SGG model flexes through the first part of your stroke, much like a wooden oar. Then the shaft rebounds for strong, whip-like action that translates more of your muscle energy into the water.

77310.02   8'   \$163.95	77310.02   9.5'   \$184.95

77312.02   9.5'   \$215.95

Blades fit Cataract, Carlisle and Sawyer 1-7/8" OD oar shafts.

## NRS HELIX BLADE

Fishing the shallows and bony streams just got easier with the Helix Blade. The asymmetrical shape puts even pressure on both sides of the oar shaft, delivering a smooth and efficient stroke. Designed to scrape fewer rocks than traditionally shaped blades in low-water. Our push-button connector locks the 1-5/8" diameter shank of the blade into Cataract and Carlisle oar shafts allowing quick, no-tool interchangeability.

## CARLISLE OAR SHAFTS

Carlisle oar shafts have proven their strength and reliability on waters around the world. Built to outfitter standards, they'll last many seasons whether you use them for fishing or river running, on flat water or whitewater. Durable, UV-resistant polyethylene plastic covers the reinforced internal aluminum body. Rubber grips cover the molded plastic handles. Our Rubber Stopper, regular Plastic Stopper and the Molded Oar Sleeve all fit directly onto the 1-7/8" shaft. Cataract, Carlisle, and Sawyer blades with 1-5/8" shanks fit these shafts.

Please note: Lengths listed are the lengths of the entire oar (shaft and blade).

### SUPERSTON OARLOCKS

The properties of our exclusive manganese-bronze alloy give these oarlocks amazing strength. They also have great “metal memory” so that if an oar gets forced up through the horns, they spring back to their original shape.

77407.01 | Single | \$47.50

### ATOMIC OARLOCKS

The ultra-strong, drop-forged NRS Atomic Aluminum Oarlock combines state-of-the-art technology with time-tested design. Pound for pound, this is the lightest, toughest oarlock out there. Our drop-forge production process yields a much higher strength-to-weight ratio compared to cast oarlocks. The durable anodized finish eliminates oxidation and discoloration, and the smooth finish protects oar shafts, rope wrap and oar sleeves from wear.

Horn opening: 1-5/8" | Shaft: 5/8" dia. x 3-1/2"L

77433.01 | Single | bronze | \$49.95

### SAWYER COBRA OARLOCKS

A fisherman’s favorite. The unique shape of the Cobra Oarlock gives increased strength and range of motion, allowing use of alternative strokes like the crab. The wide horns distribute the load of the oar across a larger surface, and the oval opening allows up to 15 degrees more vertical range. Bronze alloy construction withstands years of heavy use. Deluxe model is threaded to fit the included lock-nut.

# NRS STRAPS

There are as many uses for NRS straps as there are people who own them. First introduced in 1978, they're legendary for their strength, durability and usefulness—on the water and everywhere else. Now they're better than ever. For 2020, we've retooled the buckle with a sleeker shape and made the size indicator more visible. We've also added super-strength bar-tack stitching, a new color option, a sewn-in name label, and a nod to a favorite strap hack: bottle opener.
