# GET THE RIGHT SIZE

## How to measure:

- 1. Chest/Bust:** With arms down at your sides, measure around the largest part of the chest, generally across the nipples.
- 2. Waist:** Measure around natural waistline, allowing tape measure to sit comfortably.
- 3. Inseam:** With feet shoulder-width apart, measure from just below your crotch to the bottom of your ankle.

## Tips for taking accurate measurements:

- It's best to have someone else help do the measuring.
- Use a cloth measuring tape. If you don't have one, use a cord (or an NRS strap!) and transfer that to a tape measure.
- Measure in your street clothes; we size technical outerwear pieces like dry suits and dry tops to include room for layering underneath.
- Stand up straight and relax.
