Crossbar Pads / HD Straps

Yakima offers an array of options for carrying Stand Up Paddleboards (SUPs), longboards and windsurfers. The size of these boards can be a bit overwhelming but our solutions make them easy to load and transport.

When using Yakima SUP and Surf products, keep the following in mind:

- Maximum capacity is 2 boards.
- Longest boards on bottom and shortest board on top. Always.
- Always stack boards with fins up, fins forward.
- When using individual pads and straps, always secure boards to front and rear of vehicle using nose and tail tie-downs such as Yakima SUPBrah.
- When using a dedicated Surf/SUP carrier such as SUPUp, secure boards to front of vehicle using included tie-down per instructions.
- Center your boards front to back.
- Multiple boards must be stacked. NEVER side-by-side.
- If multiple boards are carried, use padding between boards to protect them.
- Minimum required crossbar spread is 24".

- 1 Maximum 2 boards, longest board on bottom, fins up, fins forward.
- 2 Use tie-downs specified by product.

TIP: NO PLACE TO HOOK YOUR TIE-DOWN? YAKIMA MAKES ANCHOR STRAPS (PART #8004046) THAT CREATE TIE-DOWN POINTS. GO TO WWW.YAKIMA.COM OR CONTACT YOUR DEALER TO PURCHASE THEM.
